

PICKUP HARDWARE AND SOFTWARE REQUIREMENTS ADDENDUM

Version 2.0

The following device tables represent supported hardware, operating system combinations (“Equipment”) of supported phones (tablets not supported). Per the terms herein, you agree that you possess and will maintain supported Equipment, including revisions hereto, and run the latest version of available software (“Driver App”, v 2.0 as of January 7, 2016), over the term of this agreement.

Required Services: At minimum your Equipment must include Wireless Telephone capabilities (e.g. CDMA, GSM; no iPODs), GPS capability, data capability (3g, 3gs, LTE, or comparable), and SMS.

Plan: Your Equipment must be on an active plan with sufficient data capacity to operate on the PICKUP platform. *You must maintain continuous service with a major carrier for all Required Services. You are responsible for ensuring minimum plan requirements (e.g. unlimited data; or very high data usage limits).*
